

World happiness, graphically:

Countries by [Happiness]:

(drop down menu at Happiness, can change between happiness/cantrill ladder, Positive Affect, and Negative Affect)

Options: potentially click countries on map to see Happiness over time? Or, implement another drop-down menu to select country and a choice of data compared to Positive and Negative affect:

Alternatively, if the user wishes to see timeseries, we can have a toggle for the above choice or for this. That graph will show the metric they chose, graphed over time.
